[0x0e]

not (¬) distributes over and (∧; &) ~~via~~ into OR (∨) is DeMorgan's Law: $\neg(a \wedge b) \equiv \neg a \vee \neg b$

```
mov     rcx, rax    c = a
and     rcx, rbx    c = c & b
not     rcx         c = ¬c = ¬(a & b)

not     rax         a = ¬a
not     rbx         b = ¬b
or      rax, rbx    a = a ∨ b = ¬a ∨ ¬b

cmp     rax, rcx    c = a
```

$\neg(a \& b) \stackrel{?}{=} \neg a \vee \neg b$
