shr rax, 3

↳ shifts rax to the right 3 times

ie signed / 2^3

& last-shifted bit out ← CF (& place 3 0's on the left)

adc rax, 0 "add w/ carry"

↳ rax = rax + 0 + *

ex) rax := 1000 ~ 8

shr rax, 3 ⇒ rax = 0001, CF = 0

adc rax, 0 ⇒ rax = 0001 + 0 + 0 = 1

ie 8 ⟶ 1 (8/8 = 1 ✓)

ex) rax := 0111

shr rax, 3 ⇒ rax = 0000, CF = 1

adc rax, 0 ⇒ rax = 0 + 0 + 1 = 0001

ie 7 ⟶ 1 (7/8 = 1)

↳ rounds ↑

round to nearest $\mathbb{Z}$

$f(rax \cdot 2^{-3}) \longrightarrow$ rounded to the nearest $\mathbb{Z}$

```
① shr     rax, 3
② adc     rax, 0
```

rax / 2^3 ie rax · 2^{-3}

& rax = f ~ 1111

↓ ①

0001 & CF = 1

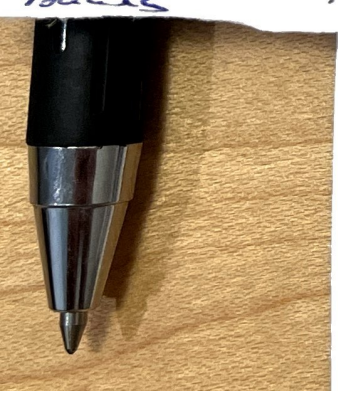
↓ ② + CF = 1

0010 ~ 2

ie $15/2^3 = 15/8 = 1 + \frac{7}{8}$

& rax = b ~ 1011

① ↓ 0001 & CF = 0

② ↓ 0001 ~ 1


$11/2^3 = 11/8 = 1 + \frac{3}{8}$
