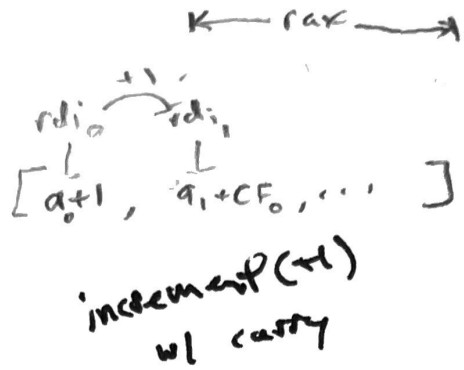
[0x0a]



increment (+1)
w/ carry

```
    add     byte [rdi],1
.loop:
    inc     rdi
    adc     byte [rdi],0
    loop    .loop
```

add byte [rdi],1

LSByte

rdi:
[.... ab c d] + 1 ie overflow if zero

.loop:

inc rdi

adc byte [rdi],0

rdi = [abcd] + 0 + CF
(rdi)

loop .loop

decrements rcx

rcx == 0 ? N → goto .loop
ie repeat

inc rdi

F

[... 1][~~abcd~~]
0000

ie increments it flows
bit-by-bit of the LSByte
